

# EI TRAINING

Now available at the click of a wheel!

## EI pre-loaded videos are now available via p.o.d.Training™!

Transform the way hospitality employees learn how to do their jobs. Through a new collaboration with p.o.d. Training™ (Portable On-Demand Training), hospitality employers can now purchase a unique new training system designed to capture the attention of a new generation of workers.

The Portable Hotel Trainer, available in both Full Service and Limited Service versions, features content from American Hotel & Lodging Educational Institute (EI) training videos, broken down into short segments ideal for pre-shift sessions, reinforcement, and ongoing training. The portable media player allows training to be brought into the work area, where employees can watch a clip on the iPod®, then immediately practice the skill. The “play list” feature enables trainers and trainees to target the exact training content needed, instead of watching through an entire video to find one piece of information.

Portable devices allow businesses to train where it is needed, when it is needed. Training time is dramatically shortened by bringing the training right into the work area. Watching short video clips followed by immediate skill practice balances high tech and high touch and gets the employee up to speed more quickly and allows for daily reinforcement in the workstation to keep training top of mind.

The pre-loaded Portable Hotel Trainer package includes a 30GB iPod®, a protective case on a lanyard, a TV cable to play clips on a TV or LCD projector, a power adaptor, and 10 earbuds.
